Dental Treatment Using Sedation/General Anesthesia at Kaufman Children’s Dental Hospital

Conscious Sedation and General Anesthesia have been proven to be safe and successful ways to treat children’s cavities. Having performed thousands of successful oral and dental surgical procedures using sedation, Dr. Elan Kaufman is recognized by his peers as one of the most experienced pediatric dental rehabilitation surgeons in the country.

The Proper Candidates for sedation are typically very young uncooperative patients, some with complicated medical problems. This includes children with special health needs, who require extensive dental treatment, and cannot tolerate treatment in the dental office under normal circumstances.
Why Choose Kaufman Children’s Dental Hospital?
Our team is one of the most experienced in the country. Also, KCDH is the only pediatric dental facility that is accredited as an ambulatory surgery center. Certified by the AAAASF, we have exceeded all required safety measures, and ensure the highest quality standards in ambulatory surgical care.

Dr. Elan Kaufman is a diplomate of the American Board of Pediatric Dentistry, and a fellow of the American Academy of Pediatric Dentistry. For over fifteen years, he has served as the Chief of Pediatric Dental Medicine and Dental Surgery at Saint Luke’s-Roosevelt, and Coney Island hospitals in New York City, and Brooklyn.
